

MECHANICAL ENGINEERING

Our Mechanical Engineering Program is for students who wish to learn about how the principles of math and science power every day machines and more! The field of mechanical engineering offers a lot of exciting career opportunities including designing cars or planes and construction engineering. We offer small class sizes, individual attention, and special classes taught by hardworking individuals within the industry!

MAJOR PROGRAM

MECHANICAL ENGINEERING

Students who decide to take the path to receiving a Mechanical Engineering AAS degree can expect to learn the magic behind the machines we see everyday! Classwork includes chemistry, statistics, circuits, fluid dynamics and aerodynamics. Students will be paired up with someone in the field during their last semester to obtain hands-on experience!
