# GBU COMPUTER SCIENCE

Our Computer Science department offers many degree pathways for students to prepare for a career in an ever growing field. We offer small class sizes, and individual attention by our faculty. This 18 month degree program was designed to provide students with all the necessary skills along with a summer internship to jump into an exciting career in the world of computers and technology.

MAJOR PROGRAMS

INFORMATION TECHNOLOGY

This program is for students interested in learning about the computer technology that powers our everyday life. With the knowledge and hands-on training in this program, students will learn the basics of computer configuration and maintenance computer applications, security and coding

CYBER SECURITY

Interested in the ongoing safety components of computers and other devices as well as the networks they belong to? Cyber Security workers are needed to play both offense and defense in refernce to potential threats and vulnerabilities. Students will learn about aspects like network security fundamentals, databases, scripting and computer securty ethics.
